Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10 and 13-18, drawn the details of a data file management apparatus, classified in class 348, subclass 231.2.
- II. Claims 11 and 12, drawn to a method of transmitting data from a digital camera to a computer, classified in class 348, subclass 207.1.
- III. Claims 19-33, drawn to the details of an image capturing system with memory, classified in class 348, subclass 231.99.
- IV. Claims 34-37, drawn to the details of an image data handling apparatus, classified in class 348, subclass 231.9.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III, and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as it can be use in any data file management system and does not require the system for transmitting data from a digital camera to a computer of invention II. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
